The prices for land in these Townships will vary secording to the situation and quality of the lots, not less however than fifty cents, and probably not ex-

The land will be sold upon a credit of four yearly payments, with interest, the three first payments to be expended in labor on the roads in the Township. where the land sold is situated, under the direction of poses only. the Land Agent, and the last payment to be in goal Each purchaser will be required by the terms of his deed, within said four years to build a house on his lot, and to clear in a proper manner fifteen acres, ten or more of which shall be laid down to grass. person in any township or tract. The Armstook Road has been completed this

year, to the Aroostook River, and as that river is navigable for boats, a good communication is now opened to the settler for an easy access to each of the shove mentioned Townships.

There has been a steady demand for settling land through the season, and more lots have been sold than in any Tormer year. As the United States have recently established a post near the mouth of the Aroostook, and another at the mouth of Fish River, and have sent a Company of soldiers to each, new roads will undoubtedly be soon opened through this section of the State, mail routes established, new markets opened for produce, and the settler will feel additional security from any border difficulty.

With the known fertility of the soil, the advan-tage of good roads and mills, and the rapid settle-ment of this part of the State, it is believed that a most favorable opportunity is now offered to young men who wish to become farmers, to secure themselves good locations, where in a few years, with in-

dustry and economy, they cannot fail to secure to themselves an honorable competency:

Their names are Thurston and Brown both addicted to habits of intemperance, though upon the ill-fated day in question, Brown is said to have been sober

The clams have generally been regarded as an unsocial, untiring and silent community, prone to no other public display than the one which threw the young boatman into such extacles But this is a great mistake, and the clams feel compelled to say, that their friend of yesterday, evidently does his author injustice, in his interpretation of the passage "Clam-ore excitiant socie, fremitu sequantur Horrisono" If he had possessed a head as long and as tough as their own, he would undoubtedly have seen, that the great writer meant to declare that the clams are exceedingly sociable, and that "their sequestered abode resound with a great roaring, evidently considering the roaring of the sea to be produced by the clams in conversation. Hence it is with propriety, called a clam-or From the expre--ion ore "the clams on the coast," it appears that in his day there were clams "in the interior " and it is fruch their abandoning the country, and confining themselves to the coast on account of the granding oppression of their could y men that the imputation on their social qualifies has probably arisen. They trust this imputation will now be removed. They have no objection to the use of the tongue but they cannot "go in" for the use of the teeth

### JORNAINES PHAS. OR VEGETABLE UNIVERSAL MEDICINE CUHATIVE

French College of Health, in Paris. THE following letter was received pesterday by mail from Salem It gives another evidence of the great success of Lorraine's Vegetible Universal Pulls

SIR I have been for many years a sufferer from the ravages of Scrosula and Cancerous Humors, which at last seated on the vitals, and exhibited all the threatening symptoms of consumption. The general mutility of all remedies awakened my enquiries as to the thousand different methods of cure, to most of which I had recourse, without receiving benefit I accidentally noticed a remarkable cure by Lorraine's Pills, and was induced to give them a trial. I sent to Boston and got a box. By the use, then, the growth of such humors of them I found immediate relief and wax soon reof them I found immediate reases stored to a perfect state of health
